Open Quant positions @ Quant-Dev

We are looking to hire Quantitative Researchers / Developers to join our team @ Quant-Dev.

We specialize in developing data driven quantitative tools and models leveraging AI and big data technologies applied to investment management, quantitative and high frequency trading for leading international investment funds.

We offer:
- An opportunity to learn about the global financial markets and scientifically transform ideas into trading strategies.
- A competitive compensation.
- An open and academic working environment.

Requirements:
- Strong quantitative skills in data analysis and problem solving.
- Strong programming skills in languages like Python, C++, etc.
- Passion to learn about the financial markets and apply scientific knowledge/skills to finance.
